

PROJECT MAREN - END CONFERENCE

# MARITIME ENERGY TRANSITION IN THE NORDICS

## ØKSNEHALLEN

Halmtorvet 11 - 1700 Copenhagen - Denmark

15.maj 2024 kl. 14-15

### PROGRAM

#### Moderator

Andreas Bach, Director Maritime Systems Innovation RISE, Manager Swedish Maritime Technology Forum

Andreas has long experience of the maritime industry and has been working in the field of maritime energy transition for the last 10 years. Mainly focusing on energy efficiency, new energy carriers and ports as energy hubs.

#### MAREN – Possibilities and challenges in maritime energy transition

Frederik H. Milling, Head of Naval Industry Affairs, Danish Maritime

Frederik has some years of experience in the maritime industry and has contributed to initiatives within the maritime energy transition but have primarily worked with the naval sector.

#### Project Nordic Roadmap

Kristina Kern-Nielsen, Environmental Consultant, Litehauz ApS

The Nordic Roadmap project charts a comprehensive course for the transition to sustainable carbon-neutral fuels across the Nordic region. The project facilitates knowledge sharing, alongside the launch of pilot projects and studies that will build experience in new fuels and establish green shipping corridors

#### Wind powered Ships

Sofia Werner, Lead Researcher Wind Powered Ships, Ph.D. (Naval Arch.), RISE Research Institutes of Sweden

Wind Propulsion for Ships – possibilities and pitfalls of an emerging technology

Konferencen finder sted i forbindelse med Scandinavian Maritime Fair som foregår i dagene 14-15 maj 2024
